**How to look good
by the people who know best!**
This week: Your wedding day

Wedding planner Steve Kemble, owner of Steve Kemble Event Design, can make every bride look like a million bucks.

- A-line dresses flatter many body shapes. Voluptuous women should try a fitted bodice and full skirt. If you have an average build, the empire cut may work well for you.
- Be sure you can walk, dance and sit in your gown!
- Keep your hair simple. Consider the natural look. Don't have a cut or color just before the big day.
- Wig tape, which is clear and sticky, can make strappy heels feel more secure.
- Hand lotion can stain your dress so go easy on it if you get your nails done.

- She wa
- She fear
